

# Multidisciplinary Studies and Emerging Trends

3rd June 2026 | Online Conference

## Call for Papers

Original and unpublished research papers, conceptual papers, review articles, case studies, policy papers and innovative practices are invited from academicians, researchers, industry experts, professionals, scholars, practitioners and students from multidisciplinary domains.

### Accepted Languages

English

Hindi

Sanskrit

Gujarati

## Concept Note

The twenty-first century has emerged as an era of rapid transformation driven by technological innovation, globalization, sustainability concerns, digital disruption and evolving human aspirations. This conference provides a vibrant academic platform to exchange ideas, share research findings and deliberate upon emerging trends shaping the future of society.

## Key Questions

- How can multidisciplinary research contribute to solving contemporary global challenges?
- How can emerging technologies be aligned with ethical, sustainable and human-centered development?
- What role can education, innovation and research play in shaping resilient societies?
- How can traditional knowledge systems and modern scientific advancements coexist for holistic progress?

## Objectives of the Conference

- Promote multidisciplinary research and collaborative academic engagement.
- Explore emerging trends, innovations and transformative developments.
- Encourage dialogue among academia, industry, policymakers and researchers.
- Provide a platform for innovative ideas, research findings and practical solutions.
- Foster interdisciplinary approaches in education, governance, technology, healthcare, environment and
- Facilitate networking and long-term academic collaborations.
